Somewhere in the desert. Iron fort – Military base. Led by Doctor Norah Hendriks the science Division of Research Facility md-02 is working on a top-secret quantum science project. Recently some promising tests took place, but “The Machine” is less than ready for use. It’s far too difficult to input commands. For this purpose, Dr. Norah has invited her old friend Prof. Fortune to help with the creation of an app to navigate the “Reality Engine”.

The project we are working on is revolutionary. It has the potential to fix resource shortages, make wars unnecessary, and even the way we live.

Holy! Are you saying what I think you are?

Have you developed a warp drive? Are we going to the stars?!

Reality Engine...  
Can't say I'm familiar  
with the term. What  
exactly does it do?

Excuse me if I'm a  
bit sceptical... but  
that sounds more  
like fiction than  
science.

Err... no... no warp  
drive... No here at  
md-02 we have  
created... *\*drumrole\**  
**A Reality Engine!**

Well... how to  
explain... it digs deep  
into the quantum  
fabrics of reality  
and... well... changes  
reality itself.

Oh, we've run our  
first tests a few  
days ago. Trust me,  
the reality engine is  
working!

A screenshot from a video game showing two women in a garage. The woman on the left has long dark hair and is wearing a black and white checkered crop top and red plaid shorts. She is gesturing with her hands towards the other woman. The woman on the right has blonde hair styled in a bun and is wearing a bright pink two-piece outfit with black accents and black thigh-high boots. She is also gesturing with her hands. A light green car is partially visible on the left side of the frame. The background is a grey concrete wall with some equipment.

Oh, how I've missed your luscious lips!

**\*giggle\***  
It's so good to see you again! Come let me greet you for real!

*kiss*

*kiss*

*With tongue*

Mhhhh!  
You taste so  
good!

Thanks!  
You too!

Love your  
dress by the  
way!

Well, thank you!  
It's the latest  
fashion at the  
office.

But yours looks very  
professional as well.  
Really accentuates  
your curves!

**You guessed it, the reality engine is  
already at work!**

As Norah shows Irene around, they walk into one of the conference rooms where Mikael is playing on his phone...

See that guy over there. He's my code monkey.

But I doubt he can help with a complex thing like that.

His name is...

Holy shit!  
It's really working!  
Look at those clothes!

Code Monkey?  
I've got a fucking  
PhD!

Hi, there!  
I'm Irene. Irene Fortune. I'll be working on your boss's project for a bit.

Nice to meet you! I hope we can work together.

Oh... err...  
\*gulp\*

**Wow!**  
She's so close! And so hot! This is ten times hotter in real than just writing these things down.  
\*gulp\*

Watch as Mikael enjoys his two willing coworkers in totally normal situations 😊.

Thanks for helping us out!

For them, this is not sex. They call it pair programming ever since I changed reality such that women can think better while having sex.

I should have this problem fixed in no time!

Oh, Yes!  
There is just nothing better than good old sex to get those brain cells going!

# End of Teaser
